

The BURLINGTON
ALMANACK,

1771. A. D. F O R

The Year of our LORD, 1771;

Being the Third after LEAP-YEAR.

*Fitted to the Latitude of Forty Degrees, and a Meridian of
near Five Hours West from London.*

C O N T A I N I N G,

The Motion of the Sun and Moon; the true Places
and Aspects of the Planets; the Rising and Setting
of the Sun; the Rising, Setting and Southing of the
Moon, the Lunations, Conjunctions, Eclipses, Rising,
Setting and Southing of the Planets; Length of Days;
Judgment of the Weather; Festivals, and other re-
markable Days; High Water at Philadelphia. — *Also,*

Some useful Hints, from a late approved Treatise
on Health; Quakers General Meetings; a Table of
Interest at Six and Seven per Cent, with other useful
Tables; a Point of Law relative to Wills explained;
Courts, Receipts, Fairs, Roads, &c. Together with a
Variety of useful and entertaining Matter.

By TIMOTHY TRUEMAN, Philom.

*TIME turns his Glass, and round the Pole
Another Year begins to roll.*

*Touch'd by the Sun's returning fire,
Stern WINTER shall ere long retire;
Soon the all-animating SPRING
Shall make the Hills and Vallies sing;
The SUMMER shall adorn the Plain
With purple Fruits and golden Grain:
And AUTUMN press the loaded Floor,
Till thankful Man shall ask no more.*

BURLINGTON:

Printed and Sold by ISAAC COLLINS.

The PREFACE.

SIRS, how strange would it look,
Should a Man write a Book,
And a PREFACE neglect to produce?
Full as bad, I suppose,
As a Face without Nose,
Which we all must allow is of Use.
Since conform then I must
To a Custom so just,
On your Candor I'll firmly rely;
And here beg to present,
With an honest Intent,
All the freshest Accounts from the Sky.
Without help of Gipsies,
You'll have the ECLIPSES,
With the Motions of Sun, Moon, and Stars;
Their Aspects, and Places,
Their various Faces,
Very useful for Landsmen and Tars.
But as Calculations,
Besit not all Satians,
Such luckless Folks here are provided;
And the Matter told plain
When 'tis likely to rain,
Tho' some Men our Skill have derided;
Yet good Folks you can tell,
How you've often done well,
When to us for Directions you've gone;
How your Hay's been in Stack,
And your Harvest kept back,
When the Storms we foretold have pour'd down.
If your Honors would know
When 'tis likely to snow,
Or to hail, or be cloudy or clear,
There's no where you'll find
An Account to your mind,
More exact or more certain than here.
But perhaps it is best,
That the Matter should rest,
In its Favor no more we'll premise;
Let the WORK praise itself,
Or lie dead on the Shelf,
By its Merit alone

T. T.

Explanation of the above Table. Find the Principal in the first Column, and against it is the Interest due for one, six, or twelve Months, as the Titles express.

Since in these patriotic times we refuse to import English manufactures—why do we consent to the importation of their fashions, which tax us more severely than the stamp act?

ECLIPSES, in 1771.

THIS Year there will be Four, two of the Sun, and two of the Moon.

The First is of the Moon, on *Sunday, April 28*, visible if the Air be clear: H. M.

Beginning of the Eclipse	8	4	} P. M.
Middle — — —	8	42	
End — — —	9	22	

Near one third of the Moon or 4 Digits eclipsed.

The Second is of the Sun, on *Tuesday*, the 14th of *May*, about 11 o'Clock in the Morning, but to us invisible, because of the Moon's South Latitude.

The Third is of the Moon, the 23d of October, near Noon, invisible.

The Fourth is of the Sun, on the 6th of November, visible if a clear Air: H. M.

Beginning — — —	1	26	} P. M.
Middle — — —	2	48	
End — — —	3	57	

Digits eclipsed 6 3-4ths.

EXPLANATION of the CALENDER PAGES.

THE first Column shews the Day of the Month; second Week Days; third Aspects of the Planets, Festivals, and Judgment of the Weather; fourth Sun's Rising; fifth Sun's Setting; sixth Moon's Place; seventh Moon's Rising and Setting; eighth Moon's Southing; and ninth High Water at Philadelphia.

LATELY PUBLISHED,

(Price Eighteen Pence single, or Twelve Shillings per Dozen) and to be sold, by the Printer hereof,

THE DEATH OF ABEL; In FIVE BOOKS;

Attempted from the German of Mr. GESSNER.

—“ **T**HE rapidity of the sale does honour to the taste of the Swiss and the Germans, it having passed through three editions in one year. The Poet has had the art to interest us in the distresses of our first parents, and their immediate descendents, by the lively and affecting manner in which he manages the passions, and by the graces and truth he throws into his paintings, while he describes the simple manners of the first inhabitants of the earth.” —

The following HINTS, extracted from a late Treatise on HEALTH, it is hoped may be useful, at least in Places remote from better Assistance.

OUR author supposes common diseases to arise, for the most part, from the following causes :

Excessive labour, continued too long, which is sometimes followed by a consumption, but oftener by inflammatory disorders, such as quinsys, pleurisies, or inflammations of the breast.

Bad effects likewise proceed from emptiness, which is the frequent consequence of great poverty ; or where people are driven by necessity to the use of unwholesome food and drink. In cases thus circumstanced, good soups and a little wine are proper.

Another cause arises from persons lying down and reposing in a cold place, or drinking cold water, when they are heated. This stops perspiration, the matter of which being thrown upon some inward part, proves the frequent cause of many violent disorders, particularly quinsys, inflammations of the breast, pleurisies, and inflammatory cholicks.

Travellers thoroughly wet with mud, are in danger of fatal pleurisies : To prevent which they should change their clothes, and bathe their limbs in warm water. The bath proves still more effectual if a little soap be dissolved in it.

The common custom of having too near the dwelling house ditches or dunghills, whence corrupted vapours are exhaled, is mentioned as a cause of putrid diseases. And that the neglect of airing lodging rooms contributes to bring on the most perplexing malignant fevers.

Drunkennes is considered either as the cause of inflammations of the breast and pleurisies, that carry off the unhappy creatures who are subject to it, in the prime of life ; or, as the foundation of a miserable and infirm old age, subject to asthmas, which terminate in dropsies of the breast. And as our bodies, when worn out by excess, cannot concur with the operation of medicines, the diseases of weakness arising from this deplorable cause, are almost always incurable.

JANUARY. The FIRST MONTH.

The true HISTORY of the GOLDEN AGE.

TELL me, cries discontented SPLEEN,
 Why such an ever-changeful Scene,
 From wet to dry, from cold to hot,
 Is ev'ry Year our hapless Lot?
 Sages have said, and Bards have sung,
 That—long ago, when TIME was young,
 No Frost annoy'd the bare-foot Swains,
 Nor stript the Verdure from the Plains; That

The use of bad provisions, tarts and cakes made of unleavened dough, and the mixture of allom in bread, are said to be very unwholesome, and a common occasion in children of inveterate and lasting disorders. Damaged corn may be helped by drying it thoroughly, by allowing it full time to rise, and baking it well.

Country people about to build, are cautioned against placing their houses too close to higher ground, or the ground floor below the surface of the earth, especially in a cold soil: either of which situations subjects them to dampness, that is injurious to health, particularly in young children, women in child-bed, and persons recovering from a preceding disease; it has also a bad effect on provisions, when a quantity is kept in store. They are advised too, if possible, to let the front of the house have a south-east exposure.

Having pointed at some of the most general causes of common diseases, the author next treats of the aggravations they sometimes receive from wrong management.

He observes that it is a prevailing prejudice in many places, and attended with very destructive consequences, that all distempers are cured by sweat, and that to procure it the patients must take abundance of hot and heating things, and keep themselves hot, by which indiscretion they have often been very evidently destroyed: for the thinner part of the blood being carried off by so hasty a discharge, the mass which was already too thick, becomes more thick, dry and inflamed, and thus increases the disorder.

Sweating it is allowed may be serviceable in diseases
B that

FEBRUARY. The SECOND MONTH.

That—in that happy GOLDEN AGE,
 They felt no Dog-Star's burning Rage ;
 No Summer's Drought, nor Winter's Snow,
 Forbade the limpid Streams to flow ;
 No Torrents of descending Rain,
 With Desolation spread the Plain ;
 No languid Air, with sickly Breath,
 Diffus'd the pois'nous Seeds of Death ;

No

that depend simply on stopt or abated perspiration, before the fever has thickened the blood, or inflamed the humours. And also in diseases when their causes are already extinguished by plentiful dilution: in which case it relieves, by carrying off some part of the distempered humours; and therefore as great care should now be taken not to check the sweat as to avoid forcing it at the beginning of the disorder.

Air being indispensably necessary to us, it is easy to conceive that our health must immediately suffer when it becomes impure, and nothing sooner renders it so, than those vapours which steam from many human bodies shut up together in a place from which the fresh air is excluded.

No solid food should be given to the patient while subject to a fever—for when a fever comes on digestion ceases, and solid food then taken proves a source of putridity, and becomes a real poison. He supposes no person in a fever did ever die merely of weakness; that therefore we need not be apprehensive of any danger from abstinence, water alone being a sufficient support for some weeks—and that of twenty persons who die in the country, two thirds would probably be saved, if being lodged in a place defended from the inclemency of the air, they were plentifully supplied with good water. As long as there remains any taste of bitterness or putrescence, a loathing, a bad breath, feverishness, with foetid stools, and little and high coloured urine, so long all flesh, and flesh soup, eggs, and all kinds of food composed of them—all venice-treacle, wine, and other heating things, are but as so much fuel to the disorder.

Another

MARCH. The THIRD MONTH.

No Comet's awful Stream of Light,
 Shot through the Curtain of the Night;
 No fable Gust flew howling by,
 No Lightnings gleam'd athwart the Sky,
 Nor Thunder shook the rolling Sphere:
 But Spring—sweet Spring was all the Year,
 Then were the Hills and Vallies seen
 For ever blooming, ever green;

PEACE.

Another disapproved practice is that of purging or vomiting a patient to procure relief at the very beginning of a distemper; but vomits given in an inflammatory disease, before the humours have been diminished by bleeding, and thined by plentiful small drinks, are productive of inflammations of the stomach, lungs and liver, of suffocations and phrensies. And purges then given sometimes occasion a general inflammation of the guts, that terminates in death.

The principal thing to be done, is to dilute and attenuate the putrid contents of the patient's bowels by plentiful draughts of cooling drinks, which may promote an easy discharge of them; for nothing can contribute to strengthen the patient, but what has a tendency to weaken the disorder.

He proceeds to lay down some rules to be observed in the beginning of diseases, and proposes a proper diet in acute ones.

Acute and feverish diseases give notice of their approach sometimes a few weeks, but commonly a few days before their actual appearance, by a light weariness or numbness, less activity than usual, less appetite, a small load at the stomach, some complaint in the head, a deeper degree of sleep, yet less composed and refreshing than usual, less liveliness, a less regular pulse, a propensity to be cold, and an aptness to sweat.

On the appearance of these symptoms, he advises the patient,

1. To omit all violent work, yet continue moderate exercise.
2. To use little or no solid food, especially flesh-broth, eggs and wine.
3. To

APRIL. The FOURTH MONTH.

PEACE, smiling, walk'd securely round,
Spontaneous PLENTY deck'd the Ground,
 The World was all serene and gay,
 And every sportive Month was MAY.

Such were the happy Days of old;
 But *now* we're pinch'd to death with Cold.
 The genial Sun's reviving Beams
May come to thaw the frozen Streams,

And

3. To drink plentifully of warm water, to a quart of which half a glass of vinegar, or a few grains of common salt have been added, with two or three spoonfuls of honey if to be had. Elder flowers, infused in warm water, and even well settled clear sweet whey, are also good.

4. To use glysters of warm water.

When the disorder is further advanced, and the patient is already seized with a shuddering and oppressive pains of body, he should have a little more than his usual covering put upon him, and drink every quarter of an hour of the liquids mentioned in the foregoing paragraph but one. The uncommon load of covering coveted during the shivering should be lessened as it abates. The heat occasioned by feathers is particularly troublesome in a fever.

When the fever is manifestly advanced, a regimen should be provided; and,

1. A mild degree of air should be kept in the room.

2. As little noise as possible should be made, and no person speak to the sick unnecessarily, nor more persons be about him, than the occasion requires.

3. His stools and urine should be immediately removed. The windows of the room be opened in warm weather, at least a quarter of an hour morning and evening, to promote an entire change of the air, during which, care should be taken that it does not come immediately upon him: If the season be cool, a few minutes may be sufficient. In extreme hot weather, willow or ash branches dipt in a pail of water, may be placed about the room.

As

MAY. The FIFTH MONTH.

And howling Winter, for a While,
 May let the fertile Vallies smile ;
 But soon the Monster will return,
 To drench us from his spouting Urn,
 To strip the verdant Hills and Plains,
 And bind the Floods in icy Chains.
 Then tell me, TRUEMAN, if you can,
 Wherefore and when this Change began ?

As to nourishment, he should abstain from solid food, for the reasons already mentioned; but may have daily the following sustenance—Take half a pound of bread, and three pints and a quarter of a pint of water: Boil them to a thin consistence: then strain it, and give the patient an eighth part of it every three or four hours, or more seldom if the fever be vehement. Groats, barley, or oat-meal may be prepared in like manner, with some grains of salt.

He may also be sometimes indulged with raw fruits in summer, or in winter with apples, &c. baked or boiled.

We may safely allow in all continual fevers, cherries red and black, straw-berries, the best cured raisins, raspberries, mulberries, if perfectly ripe; the more juicy kinds of apples and pears, and the juice of very ripe plumbs, mixed with water, will sometimes assuage thirst in a fever admirably. These should however not be taken so as to overload the stomach, but in small quantities, and often China oranges and lemons are also proper, but not their peel, which is hot and inflaming.

For drink—a glass or a glass and a half of such fruit as has been mentioned, may be added to three full pints of water, of which the sick may take three or four ounces every quarter of an hour.

Glisters should not be given while he is in a sweat, that seems to relieve him, but are very proper if the fever rages high, and is attended with great pain in the head and loins.

He should use himself to sit up when not in a sweat

JUNE. The SIXTH MONTH.

A Moment's Thought will make it clear ;
 No Change has happen'd in the Year ;
That runs its first-appointed Round :
 But—in *thyself* the Change is found !

Young HEALTH and INNOCENCE together
 With Pleasure brave the rudest Weather,
 While all the Changes in the Sky
 Come and return unheeded by.

But

if he has strength to bear it—as it tends to lessen the fever, head-ach and delirium.

His bed should be daily made, and the sheets and wearing linen changed every two days, if it can be safely done ; nothing conducing to continue the fever more than to confine the sick continually to bed, without changing his linen that is filled with putrid steams and humours.

While the fever is declining, the quantity of nourishment may be increased, but the quality should be the same as before-mentioned. When it is completely terminated, the patient may venture on a little white meat if tender, a little flesh soup, an egg now and then, and wine properly diluted ; minding not to exceed in quantity ; for that may cause a relapse, which should carefully be guarded against. We are not nourished in proportion to the quantity we swallow, but to that we digest.—To complete the recovery from fevers, let the following rules be observed :

1. Let those who are recovering, take but little nourishment at a time and often.
2. Take but one sort of food at a meal, and not change it too often.
3. Chew whatever solid viſtuals they eat very carefully.
4. Let them diminish their quantity of drink. Too great a quantity of liquids at this time may obstruct the recovery.
5. Let them go abroad as often as they can, either on foot, in a carriage, or on horseback, which last is preferable, before their principal meal, which should be about noon, and never ride after it.
6. Let

JULY. The SEVENTH MONTH.

But AGE, that Winter of our Life,
 Fatigu'd with many a busy Strife
 In search of Power, Wealth or Fame,
 Is ill at Ease, and thinks the Frame
 Of Nature, by some hidden Curse,
 Is vastly alter'd for the worse,
 The Wind's at East, the Sky o'er-cast :
 You're chill'd before you feel the Blast.

6. Let them take but little food in an evening—their rest will be less disturbed, and repair them the sooner.

7. They should not remain in bed above seven or eight hours.

8. In this state it is not necessary they should go to stool every day, tho' they should not be without above two or three. A glister is proper on the third day, and even sooner if they are heated by their costiveness, feel puffed up, or restless, and have pains in the head.

9. If the fever, weakness, and sick stomach still continue to hang about them, they should take the following medicine, which fortifies digestion, recovers the strength, and drives away the fever.

Divide an ounce of the best Jesuits bark in fine powder, into fifteen equal portions, and take three doses daily, till the whole be used.

10. Let them by no means return too soon to their labour; such indiscretion daily prevents many labourers from ever being perfectly restored to their health.

On EMULATION.

SO many are the difficulties that roughen the path of Science, that man, without some incitements, would be apt to hesitate in his course, or proceed onward with indolent indifference.—When we first set out on our journey, the mind, by an extensive view, overlooks the length and obstructions of the way, and imagines itself already within attainment of the end; but

AUGUST The EIGHTH MONTH.

The Sun breaks out—you pant for Breath,
 And cry—the Heat will be your Death !
 Next you complain of Hail or Snow :
 In better Days it was not so.
 You now regret that happy Time
 When harmless Youth was in its Prime,
 When Pleasure blossom'd every Day,
 And every Month, *you thought*, was May.

but as we proceed, the prospect more and more enlarges, difficulties start up after difficulties, and the mind sees (as Pope expresses it)

Hills peep o'er hills, and alps on alps arise.—

What then can support our spirits amid the toil of so long a journey? nothing but a generous EMULATION, which sets before us the example of others, who have, by unwearied diligence, obtained a seat in the temple of Fame. She draws forth every latent emotion of the soul into action, bids Imagination present us with the glories that await us, points out the laurel crown, which the Muses hold for the successful, and fills the mind with such a thirst for knowledge, as nothing but death can end.

'Tis true Emulation does not exert itself in every breast that engages in the fields of science. There are some men of such narrow and contracted spirits as to be incapable of feeling any animating warmth, at the recital or representation of the most distinguished actions. They can bear censure, or see a rival towering to the most exalted heights of glory, with a more than Stoic apathy. They are actuated in their researches for knowledge by Self-interest or avarice, and intend their improvements, not for the public, but for their own private utility and pleasure. Such wretches, however, reason and experience never fail to prove incapable of making any considerable progress, or if they should, it would be only in spinning metaphysical cobwebs, viewing the dark sides of humanity, and raising gloomy ideal systems, agreeable only to persons of the same cloudy Imaginations.

Not

SEPTEMBER. The NINTH MONTH.

Here then let *Fiction* speak the *Truth*,
The Joys of *Innocence* and *Youth*
Are all that either *Bard* or *Sage*
Intended by the GOLDEN AGE.

But still, " cou'd you your Wils obtain,
" Winter shou'd never frown again!"
First you *mistake*—then rashly *blame*,
That equal, universal Aim .

Not more beneficial to the sons of Science, than to the sons of Mars, is *Emulation*. There is something so agreeable in private life and retirement, that nothing but an ardent desire of glory could determine the mind, to make the horrors and fury of arms preponderate in the scale of reason; to have the stream of life run smoothly on, without any rocks or signals to disturb or divide the current; to bask in the beams of pleasure, and find the downy couch of love unmolested, are blessings one would imagine sufficient to oblige every other incitement, and hold the human heart, so naturally open to their allurements, in the strongest fetters.—But when *Emulation* diffuses her winning radiance, these mists of luxury disperse like darkness before the rising sun.—Warmed with an unbounded desire of fame, the hero scorns the soft solicitations of ease, and rushes amid the fury and terrors of war, resolved to seize the crown of immortality, by glorious conquest or glorious death.—If it were necessary, I might, to enhance the merits of *Emulation*, point out how many nations have rose, from the lowest obscurity, to the highest pitch of human grandeur, by the *emulative* flame which glowed in the breasts of their warriors and senators—Instance its power by the example of Sparta, which sustained itself with glory amid the attacks of so many and such powerful enemies.

Let it suffice to say, that *Emulation* is the fountain of all our improvements in arts and sciences—the nurse of statesmen—the shield of government—the cherisher of virtue—'tis a spur to the physician—it gives wings to the muses—courage to the soldier—patience to the lawyer—

OCTOBER. The TENTH MONTH.

Of PROVIDENCE, which only cou'd
Convey to ALL their Share of Good.

Were we to have no Winter here,

Others must have it all the Year.

But HE, whose Wisdom rules the Sky,

Surveys us with no partial Eye:

He whirls the changing Seasons round,

By Turns to fertilize the Ground,

And

lawyer—and engages men of sense to undergo the tedious operations of the barber—and enter on the disagreeable task of discharging vollies of elegant nonsense, to win a smile of approbation from the *haughty Fair*. O

RICHES AND POVERTY:

An ATHENIAN ALLEGORY.

“*CHREMYLUS*, who was an old and a good man, and very poor, yet desirous to leave some riches to his son, consults the oracle of *Apollo* upon the subject. The Oracle bids him follow the first man he should see upon his going out of the temple; the person he chanced to see, was to appearance an old sordid blind man, but upon his following him from place to place, he found him to be *Plutus*, the god of riches—*Plutus* told him, that when he was a boy, he used to declare, that as soon as he came of age, he would distribute wealth to none but virtuous and just men; upon which *Jupiter* considering the pernicious consequences of such a resolution, took his sight away from him, and left him to stroll about the world in that blind condition. *Chremylus* prevailed upon him to go to his house, where he met an old woman in a tattered raiment, who had been his guest for many years, and whose name was *Poverty*. The old woman refused to turn out so easily as he would have her; upon which he threatened to banish her not only from his own house, but out of all *Greece*. *Poverty*, in reply, represents to her old landlord, that should she be driven out of the country, all their trades, arts and sciences, would be driven out with her; and, that in every

NOVEMBER. The ELEVEN. MONTH.

And rescue Man from hungry Dearth,
In every Region of the Earth.

The Female CHOICE—a Poem.

IF marriage ever be my lot in life,
And I by fate am destin'd for a wife,
If e'er to love's soft power I yield my heart,
May worth inspire, and merit point the dart;

May

every one was rich, they could not be supplied with those ornaments and conveniences of life which make riches desirable; she likewise represented to him the several advantages which she bestowed upon her votaries, in regard to their shapes, health and activity, by preserving them from gouts and intemperance—But she was forced to remove, notwithstanding what she had to say. *Chremylus* then conveyed *Plutus* to the temple of *Esculapius*, where he recovered his eyes, and began to make a right use of them, by enriching every one that was distinguished by piety and justice, and taking away his gifts from the impious and undeserving. Soon *Mercury* descends with great complaints from the *Gods*, that since the good men were grown rich, they had received no sacrifices, which is confirmed by a priest of *Jupiter*, who said, that since these late regulations, he was reduced to a starving condition, and could not live upon his office. *Chremylus*, who in poverty was religious, proposed, and was joined by all the good men now also grown rich, that they should carry *Plutus* in solemn procession to the temple, and instal him in the place of *Jupiter*.

This ALLEGORY instructed the *Athenians* in two points; first, as it vindicated the ways of Providence in its ordinary distributions of wealth; and, in the next place, as it shewed the great tendency of riches to corrupt the morals of those who possessed them."

When a Citizen travels into the Country, he should not affect to despise the Manners and Customs of the Farmers; it by no Means shews Good-breeding.

A Silk Gown of a Woman's own raising, will afford more real Pleasure than the richest foreign Brocade.

DECEMBER. The Twelfth Month.

May he to whom my hand and heart are given;
 Have every blessing from indulgent Heaven;
 Each noble virtue with his soul be join'd,
 Good sense adorn, and honour guide his mind;
 In temper mild, in judgment sound and clear,
 Courteous to all, and to his friend sincere;
 Grave without rudeness, and polite with ease,
 His rule good-manners, and his aim to please;
 Proud

As possibly many Persons in this Province may be unacquainted with the following Point of LAW, it may not be amiss to publish it—

IF a Man, in his Will, leaves his Estate to be equally divided amongst his Children, and after the Date thereof lives to make any Alterations in his Possessions, such as converting Money at Interest into real Estate, or exchanging one House or Plantation for another—such Estate, so purchased or exchanged, shall not, after his Death, be equally divided amongst the Children, agreeable to the Will; but the eldest Son, as Heir at Law, shall take it—for, says the Law, a Man can't will away what he is not possessed of at the Time of making his Will.

* Most sorts of Spanish silver is sold in London by the ounce, and often varies, but seldom or ever exceeds 5/5. In Pennsylvania it sells for 8/6 per ounce.

Proud to oblige, a stranger to deceit,
Ambitious rather to be good than great;
May winning candour, and un sullied truth,
Adorn each action of th' accomplish'd youth;
Blest with his love, no higher bliss desire,
Content with that, let vainer joys expire!
Let vain coquets their empty triumphs boast,
My only glory is in pleasing most
The youth who best deserves my heart to share,
Whose kind affection claims my every care,
Thro' the uncertain, rugged paths of life,
Fulfil with joy the duties of a wife;
And, till his growing virtues cease to shine,
Pleas'd I'll admire, and strive to make them mine.

The BACHELOR's SUPPLICATION.

I F on this busy theatre of life,
My destiny alots to me a wife,
Auspicious Powers! Oh may my nuptials prove
The calm result of judgment mixt with love!
O may I ne'er precipitately wed,
By a false flame of sudden passion led;
But may my love be permanently plac'd
On that which ne'er can be by time effac'd.
'Tis merit that alone can point the dart
Which finds a passage to my guarded heart.
The gay coquet, and artful jilt shall be,
With the starch'd prude, alike contemn'd by me.
The heiress too, who gains into her arms
More lovers by her THOUSANDS than her charms,
Has not the least allurement in my eyes,—
Her dress, wit, wealth, and airs, I all despise,
No interested views can sway my mind,
I'm to all charms but those of merit blind.

Oh may the maid to whom I yield my heart
Be free alike from vanity and art!
May every virtue grace her spotless breast;
And she each folly of her sex detest.

JOSEPH BORDEN'S STAGE
CONTINUES going between *Philadelphia* and
New-York, as usual.

Tuesday in May, August, November and February. At Lancaster, the first Tues. in the months aforesaid. At Suffex, the First; at Kent, the Second; and at Newcastle, the third Tuesdays in the same Months.

Mayor's COURTS in Philadelphia are held,

THE first Tuesday in January, April, July, and the last Tuesday in October.

Provincial COURTS in Maryland,

TWO in a year held at Annapolis, viz. The second Tuesday in April and September.

Mayor's COURTS for the City,

Are held quarterly at Annapolis, viz. The last Tuesday in January, April, July and October.

GENERAL COURTS:

IN Virginia, there are two held at Williamsburg yearly; one the 10th of April, the other on the 10th of October, which hold 24 Days (Sundays excluded) and no longer.

Courts of Oyer and Terminer, at Williamsburg, the second Tuesdays in June and December.

Choice Receipts, for several Diseases, &c.

For a fore Throat.

Take half a pound of figs, put them in a quart of spring water, and let them simmer over a slow fire till better than one half is wasted; in the mean time take a large lemon, cut it into slices, and between every slice put some brown sugar-candy, and let it stand before the fire to roast; then strain the figs, and squeeze them thro' a coarse cloth; put the juice of the lemon into it, and gargle your throat with it while it is warm.

An infallible Cure for the Stone and Gravel.

Take one tea spoonful of the strongest soap-lie, mixed in two table spoonfuls of sweet milk, an hour before breakfast, and at going to bed. Before you take the medicine, take a sup of pure milk, and immediately after you have swallowed the medicine, take another. If you find this agree with you for two or three days, you may add half as much more to the dose.

For an Asthma.

Take three quarters of an ounce of sena, half an ounce of flour of sulphur, two drachms of ginger, half a drachm of saffron,

saffron, powdered and mixed with four ounces of honey, take the quantity of nutmeg night and morning as occasion may require.

For the bite of a Rattle-snake.

Take of the roots of Plantane or Hoar-bound (in summer roots and branches together) a sufficient quantity, bruise them in a mortar, and squeeze out the juice, of which give as soon as possible, one large spoonful; if he is swelled you must force it down his throat; This generally will cure; but if the patient finds no relief in an hour after, you may give another spoonful, which never has failed.

If the roots are dried, they must be moistened with a little water.

To the wound may be applied, a leaf of good tobacco moistened with rum.

A Method to take Honey, and preserve the Bees.

Drive them down to the bottom of their hives with the smoke of rosemary, and then with a knife cut the combs, and take them out afterwards with a ladle, and shut the top of the hive again, but you must never take above half of the honey, that the bees may have some foundation to go to work upon again.

Approved Receipts for the Cure of Disorders incident to Horses.

For the Imposthume in the Ear, Poll-evil, Fistula, swelling after Bloodletting, any galled Back, Canker in the Withers, Setfast, Wens, Navel-gall, or any hollow Ulcer.

TAKE clay, of a mud or loam-wall, straws and all, and boil it in strong vinegar, and apply it plaister-wise to the fore, and it will of its own nature search to the bottom, and heal it, provided that if you see any dead or proud flesh arise, you eat or cut it away.

A most excellent Receipt for the Botts or any Worm, which is the most easy and most certain without sickness.

Take the soft downy hairs which grow in the ears of an horse, and which you clip away when you poll him, and the little short tuft which grows on the top of his forehead, underneath his foretop, and a pretty quantity of them, mix them well with a pottle of sweet oats, and so give them to the horse to eat, and there is not any thing will kill worms more assuredly.

For

For Horses that have eaten Horse-Leaches, Hens-Dung, &c.

If your horse has drank horse-leaches, eaten hens-dung, feathers, or such like venemous things, which you shall know by his panting, swelling, or scowring; you shall take the herb sowthistle, and drying it, beat it into powder, and put three spoonfuls thereof into a pint of Ale, and give it to the horse to drink.

For the Diseases of the Gall, and especially of the yellows.

From the over-flowing of the gall, which is the vessel of choler, spring many mortal diseases, especially the yellows, which is an extreme faint mortal sickness, if it be not prevented in time: The signs are, yellowness of the eyes and skin, and chiefly underneath his upper lip next to his fore-teeth, a sudden and faint falling down by the highway, or in the stable, and an universal sweat over all his body: The cure is, first to let the horse blood in the neck or mouth, or under the eyes; then take two penny-worth of saffron, which being dried, and made into fine powder, mix it with sweet butter, and in manner of a pill, give it in balls to the horse three mornings together; let his drink be warm, and his hay sprinkled with water.

For the canker in the nose or any other part.

To heal any canker in what part soever it be; take the juice of plantain, as much vinegar, and the same weight of the powder of allum, and with it anoint the sore twice or thrice a day, and it will kill and cure it.

F A I R S are kept,

AT Noxontown, April 29 and October 21;
Wilmington, May 9 and November 4;
Newcastle, May 14 and November 14;
Chester, May 16 and October 16;
Bristol, May 19 and November 9;
Burlington, May 21 and November 12;
Philadelphia, May 27 and November 27;
Lancaster, June 12 and November 5;
Marcus-Hook, October 10;
Annapolis, May 12 and October 10;
Charlestown, May 3 and October 29;
Newark, the 3d Thursday in April and October;
Dover, April 21 and October 12;
York-Town, June 9 and November 2.

*** There is a *new* and *complete* STAGE established by JOSEPH HAIGHT and JOHN WATSON, between *Burlington* and *New-York*, which conveys the Passengers to either Place in two Days.—It sets out from *Burlington* on every *Monday* and *Thursday* Mornings by Sun-rise; and carries the Passengers to *Amboy Ferry* the same Evening, where they meet the *New-York* STAGE BOAT. The Waggon then takes the Passengers from the said Boat, and returns to *Burlington* on every *Tuesday* and *Friday* Evenings, where the *Burlington* STAGE BOAT immediately conveys them to *Philadelphia*.

R O A D S *Northeastward.*
